

**CLEAN VERSION OF AMENDMENTS IN THE CLAIMS**

Please amend claims 3, 9, 13 and 14 to read as follows:

C1 3. (twice amended) A mixture as claimed in claim 1, wherein the monomer (e) is used in a weight amount of from 0.01 to 10%.

C2 9. (amended) A mixture as claimed in claim 1, comprising, as inorganic UV filter B), at least one hydrophobicized metal oxide chosen from the group consisting of titanium dioxide and zinc oxide.

C3 13. (three times amended) A process for the preparation of cosmetic and dermatological preparations wherein a mixture is prepared as defined in claim 1, and then optionally mixed with other compounds.

14. (three times amended) The process as claimed in claim 13 for producing cosmetic and dermatological preparations for protecting the human skin or human hair against solar rays, wherein the mixture is prepared, and then mixed with compounds which absorb in the UV region and which are known per se for cosmetic and pharmaceutical preparations.

16. (amended) A mixture comprising

C4 A) at least one copolymer obtained by

(i) free-radically initiated solution polymerization of a monomer mixture of

(a) 10 to 70% by weight of 3-methyl-1-vinylimidazolium methosulfate,

(b) 20 to 89.95% by weight of N-vinylpyrrolidone,

(c) 0.05 to 5% by weight of N,N'-divinylethylenurea

and

HOESSEL et al., Serial No. 09/771,595

- Cy  
Cond
- B) 30 to 90% by weight, based on the solids content of the mixture, of at least one hydrophobicized metal oxide chosen from the group consisting of titanium dioxide and zinc oxide.
